

# FAA Type Certificate and Data

## Liberty XL-2 General Aviation Aircraft

### *Make Offer*

#### BACKGROUND:

- 2-place, low-wing general aviation airplane
- FAA Part 23 certified in 2004 for VFR/IFR
- Manufactured from 2004-2011
- 132 units delivered

#### WHAT'S INCLUDED:

- FAA Type Certificate (TC)
- Type Certificate data
  - Engineering drawings
  - Assembly drawings
  - Flight test cert data
  - Flight manual
  - Maintenance manual
  - Parts manual
  - Structural cert test data
  - TC scope & limitations
  - Know airworthiness issues
  - Production & QC manuals  
(Requires production certificate renewal/cert)

#### WHAT'S NOT:

- Tools, jigs, forms, dies, fixtures, etc.
- Trademarks
- Inventory
- Supplemental Type Certificates (STCs)

#### MONITIZING TC & Data:

- Parts and service
- Modifications/upgrades (STCs)
- Licensing/parts manufacturing agreements
- Operator support packages
- Production/variant manufacturing

#### BUYERS/VALUE PROPOSITIONS:

- **GA aircraft manufacturers:** Supplemental products & services revenue, fleet synergies, extended support, brand portfolio diversification, reduced cert costs
- **MRO providers:** Offer certified replacement parts, engineering services, and STC development
- **STC houses/Engineering firms:** Develop STCs, upgrades and specialized variants
- **Parts suppliers:** Enables PMA parts and potential licensing to others, expanding revenue
- **Investors:** Acquire the TC/data as an IP asset, monetize parts & support, potentially relaunch production
- **Aircraft restoration:** Support niche fleets with bespoke parts and services

#### HISTORY:

Derived from the Europa XS kit plane, Liberty Aerospace of Melbourne, FL began certified production 2004

#### TECHNICAL DESCRIPTION:

- Seats: 2
- Cruise Speed: 125 kt.
- Range: 500 nautical miles
- Airframe: Fiberglass fuselage, metal wing
- Powerplant: 125 hp Continental IOF-240-B
- Engine Control: FADEC (computer-controlled)
- Propeller: MT composite
- Take-off weight: 1750 lb.
